PROFESSIONAL SUMMARY

IT Project Manager at Toyota Motor Europe with a scope that goes beyond delivery: security deployment planning, IT sustainability reporting, service design and cross-border problem-solving, alongside €6M+ of hardware programmes. Certified Product Owner with a hands-on development background — I build tools as well as plans. Looking for complex, open-ended problems and a path toward programme management.

PROFESSIONAL EXPERIENCE

Project Manager — Toyota Motor Europe (via Nilort IT Group & Computacenter BV) *Sep 2023 – Present*

- **Secure Boot deployment planning:** designed the end-to-end project plan for a company-wide Secure Boot rollout covering office, operational and manufacturing environments — 3 phases, 21 workstreams and milestones (2026).
- **IT sustainability baseline:** built an automated CO_2 and energy analysis of the hardware fleet (Python, asset data, Belgium-specific emission factors) to give the organisation its first per-model environmental baseline for ESG reporting.
- **Cross-border procurement problem-solving:** analysed a recurring laptop procurement failure at an international hub, structured the options and cost impact, and proposed Kaizen-style process improvements to management.
- **Service design — Ricoh Smart Locker "I Forgot":** designed and implemented a self-service peripheral lending service (€500K): user journey, escalation workflows and documentation.
- **Hardware programmes (€6M+):** led the 4,000+ device end-of-life replacement across Belgium and Europe (€4M+), the full iPhone fleet renewal (€1.4M) and a printer fleet renewal across 4 sites — delivered with minimal user disruption.

Frontend Development Intern — Hike-Up / Catch-Up *Feb 2023 – May 2023*

- Built the mobile version of the company's web tool; improved codebase stability and aligned the UI with UX specifications.

SIDE PROJECTS

- **Lunch Orders — team ordering web app:** designed, built and deployed a React + Firebase app used daily by ~10 colleagues: real-time ordering and chat, notifications, and AI-powered menu extraction via the Claude API (Vercel serverless). github.com/BrognietGeoffrey/Lunch-Order

EDUCATION & CERTIFICATIONS

Bachelor's Degree in Technology & Computer Science — EPHEC, Belgium *June 2024*
Certified Product Owner — [certifying body] *Sep 2024*

SKILLS

- **Project & programme:** Jira, Microsoft Project, ServiceNow, Trello; stakeholder & vendor coordination, budget follow-up, Agile/Scrum, Kaizen / continuous improvement.
- **Data & automation:** Python for analysis and reporting automation, SQL/Firestore, Excel.
- **Development:** JavaScript (React), Git, REST APIs, serverless deployment (Vercel), AI integration (Claude API).

LANGUAGES

- **French:** native • **English:** professional working proficiency • **Dutch:** elementary (A2)
